Proposed User Flow

1. Consumer scans QR code on product packaging

Request for CCD Review:

2. QR code directs to Compliance Hub page (this mock demonstration)

This mock demonstrates our proposed compliance information delivery system.

3. Consumer enters BioTrack number from product label into search bar

We seek written confirmation that this approach meets New Mexico cannabis

4. System instantly filters to matching product lot

5. System instantly filters to matching product lot

5. Consumer views complete compliance information including COA access

6. Consumer can click "View COA (PDF)" for detailed lab results
